

Driver care

Smaller drivers need lower power amps, or keep the volume down. Over-driving smaller speakers can cause damage.

Don't touch the cones.

Handling with care

Markaudio makes ultra-high performance speakers. Look after these speakers and they will give you years of musical pleasure. Like racing cars, weight is the enemy, low mass is the goal. That means cones are thin, coils are light and suspensions are highly elastic. So take it easy. Don't over-power the speakers. Handle with care. Touching the cones with your fingers, wiping them with cloths, or any pressure may cause damage. Your warranty depends on treating these speakers with care.
